A. A point escapes to infinity
Hyperbolic Wasserstein
Geodesic sliced
limit π/2
Distance from the origin
Hyperbolic radius r
B. Rare distant mass
$W_2^2 = n^3$
$D_2^2 \le \pi^2/(4n)$
Squared distance to the origin
Sequence index n
C. Sharp sampling exponent
Exact binomial sum
$1/\sqrt{2\pi}$
$\sqrt{n}\,\mathbb{E}|B_n/n - 1/2|$
Sample size n
